

**Non-therapeutic
circumcision is the
forced amputation
of the foreskin of a
healthy baby boy.**

**Circumcision survives,
generation after
generation, much like
a virus, by perverting
and exploiting aspects
of our human nature.**

**Many people think
that if circumcision was
damaging, medical
professionals would
refuse to do it.**

Many medical professionals do see circumcision as damaging, but are unable or unwilling to speak out against it.

**This hospital performs
non-therapeutic
circumcisions when
parents request it. They
have told me this will
not change.**

**I hope to raise
awareness, encourage
charitable discussion,
and to protect those
who cannot yet
protect themselves.**
